

KAMWE

Mission Statement

To establish the most efficient and effective support maintenance and operation of fleet services by providing customers with safe, reliable, economically and related support services that are responsive to the needs of customer departments and that conserve vehicle value and equipment investment.

Values

The core values of Kamwe is based upon a foundation that is built with a dedicated staff who believe in proving dedication, efficiency innovations and integrity at all times which enable and allow fleet management to continue to deliver the highest quality of customer satisfaction.

Vision

To be recognized as a quality fleet operator by providing easy and convenient fleet management systems and other related software development.

ABOUT US

We believe that inexpensive data (SMS) has made it easier for organizations of all types to gather data in ways not possible before (poor internet connectivity in some parts of the world).but with such disconnected data, it's challenging to adapt and complex to analyse. Kamwe is here to change that. In 2017, the Internet was disconnected across the South West region of Cameroon and this birth Zoomed SMS car tracking now KAMWE. Kamwe is the leader in sOT and IoT. Our mission is to increase efficiency, safety and sustainability of the operations that power our economy. Kamwe's portfolio of complete sOT and IoT combines hardware, software and cloud to bring real time visibility, analytics and artificial intelligence (AI) operations. Kamwe is a leading global provider of vehicle telematics, asset recovery, sms based analytical solutions for asset management, Real Time platform, Driver safety (Risk assessment), fleet management, software development, insurance telematics services. Our cutting edge technology provides the best intelligent, fleet operators and security solutions for all vehicle owners across African countries and beyond. (Cameroon, Congo Brazzaville and Kinshasa, Côte d'Ivoire, Gabon , Guinea Conakry, Mali, Burkina Faso, Canada and parts of north America)

GOAL

Goals

- To provide for a centralized fleet management function in order to maximize vehicle usage and efficiency of fleet operations
- To provide customer-focused, strategic and systematic approach to continuous performance improvement. To provide low cost fleet management to consumers across the globe
- To prevent the prevalence of car thefts and vehicle recovery.
- To provide personal tracking and health care solutions
- Kamwe Provides solutions for lone workers who occasionally face security risks as a part of their jobs, children, and elderly persons with health risks (Alzheimer/dementia) children etc.
- Kamwe provides Flexible integration options suitable for asset recovery.

A hand in a yellow sleeve is pointing at a white airplane on a yellow background. The airplane is a small, white, single-engine propeller plane with a high-wing configuration. The hand is positioned as if it is about to touch the airplane. The background is a solid yellow color. The text 'OUR EXECUTIVE SERVICES' is overlaid on the yellow background in white, bold, uppercase letters.

OUR EXECUTIVE SERVICES

ASSET TRACKING

- Real time location of valuables,
- Track record of maintenance via email alerts or sms
- Report history of asset deployment,

HOW DOES KAMWE WORKS

Kamwe uses Global Positioning Systems (GPS satellites) and GLONASS to know the vehicle or equipment's location at all times. The information that is gathered from the vehicle is then stored on the device inside. The data is then transmitted by using a wireless, or cellular network. The device delivers data to track your fleet to kamwe's application which can be accessed at all times. Kamwe notifies you of real-time vehicle tracking updates, location history, direction, speed, idle time, ignition alerts etc. allowing customers to manage a tighter schedule and a more efficient fleet.

INSTALLATION PROCESS

- With our professional hardwire installers, engineers can visit your site and handle the installation.
- Vehicles can be installed within 25minutes to 45minutes.
- An engineer can visit your site and handle the installation
- Vehicle down-time is scheduled while the trackers are fitted
- Device is completely hidden from view
Tamper detection activated
- Device is soldered into place
- Tailgate lift & emergency door warnings.

BENEFITS OF USING KAMWE

- Easy to use software: Kamwe provide your business with easy to use web and mobile applications where ever you are
